

Neetika Mittal

Senior Software Engineer at Meta

@ neetikamittal2010@gmail.com

+44 7816196923

in neetika-mittal-a01a7387

Education

Jamia Hamdard University

- Bachelor of Technology in Computer Science and Engineering (**Gold Medalist**)
CGPA 9.54/10.00

New Delhi, India

Jul 2009 - May 2013

Experience

Meta

Senior Software Engineer

Jul 2022 - Present

London, UK

- Led the design and development of Generative AI-powered features including Virtual Backgrounds, Video Calling, Screen Share, Live AI for smart glasses — enhancing user experience for 2 billion+ global users across Meta platforms.
 - <https://www.theverge.com/2024/11/20/24301722/meta-facebook-messenger-video-calls-ai-backgrounds>
 - <https://about.fb.com/news/hey-uk-your-ray-ban-meta-glasses-just-got-smarter-with-meta-ai-features>
- Spearheaded the successful launch of WhatsApp Augmented Reality (AR) effects in video calls and camera, delivering cutting-edge immersive capabilities to millions of users worldwide.
 - <https://blog.whatsapp.com/introducing-filters-and-backgrounds-for-video-calls>
- Optimized Messenger's calling pipeline, achieving a 35% reduction in call latency, significantly improving real-time communication quality.
- Diagnosed and eliminated audio/video stalls on Instagram, leading to a measurable boost in playback reliability and user engagement.
- Contributed to a major camera stack redesign, improving performance, maintainability, and future readiness of Meta's multimedia infrastructure.

Uber

Senior Software Engineer

Sep 2019 - Jun 2022

Hyderabad, India

- Founding engineer of Uber's Mobile Payments Team, responsible for building and scaling payment solutions across global markets.
- Led the design and development of Uber's template driven PaymentSDK, reducing payment integration time from 6 months to 2 weeks, enabling rapid expansion into new regions.
- Spearheaded the launch of key regional payment methods, contributing to \$1 billion+ in processed revenue globally:
 - Launched Apple Pay in Hong Kong, Australia, and Brazil for Rides and Eats.
 - Launched Apple Pay Strong Customer authentication (SCA) across Europe for compliance and secure payments.
 - Launched Amazon Pay and Unified Payments Interface (UPI) with deep intent flows for India.
 - Launched bKash in Bangladesh
 - Launched PayPay in Japan.
- Integrated major payment providers such as Paypal, Venmo, Paytm, Zaakpay, directly into Uber's iOS app.
- Introduced robust payment flows, improving security and resilience, and reducing payment-related downtimes and failures significantly.

Citrix

Senior Software Engineer

📅 Apr 2018 - Sep 2019

📍 Bangalore, India

- Secure Mail (Enterprise Email Platform)
 - Contributed to the development of Secure Mail, a secure enterprise email application supporting Exchange and IBM Lotus Notes servers.
 - Designed and implemented user-centric features including notification support for custom folders and dynamic feed card categorization based on usage patterns.
 - Enhanced product reliability and performance by identifying and resolving high-priority production issues.
 - Improved code maintainability and system robustness through targeted refactoring and quality improvements.
 - <https://itunes.apple.com/in/app/citrix-secure-mail/id1155203964?mt=8>
 - Podio: (Task management & collaboration tool, acquired by Progress Software Corporation)
 - Led engineering efforts to modernize the iOS codebase of Podio, migrating the code base of the app from Swift 2.5 to Swift 4.0
 - Proactively identified and fixed user-reported issues, improving app stability and user satisfaction.
 - <https://apps.apple.com/us/app/podio/id404183617>
-

OLX

Senior Software Engineer

📅 Sep 2015 - Mar 2018

📍 New Delhi, India

- OLX Local Classifieds (Marketplace App)
 - Played a key role in the development of OLX's flagship mobile app, India's leading local classifieds platform enabling users to post ads, browse listings and connect via in-app chat.
 - Designed and implemented highly reusable, custom UI components to ensure a consistent and scalable user experience across the app.
 - Led end-to-end development of several critical modules, including Login/Registration, User Profile, Testimonials, Communities, User Ads, and Chat, contributing directly to core user engagement workflows.
 - <https://itunes.apple.com/in/app/olx-local-classifieds/id913492792?mt=8>
-

App Street Software Pvt. Ltd.

Software Development Engineer

📅 Jun 2014 - Sep 2015

📍 Gurgaon, India

- Designed and developed multiple end-to-end iOS applications for one of India's largest telecom providers: **Airtel Thanks**, **Airtel Money**, **MyAirtel** and **Airtel One**.
 - The apps have combined **download of more than 10 million+**.
 - <https://apps.apple.com/in/app/my-airtel/id543184334>
 - **Pitch Vision**: Developed core features for a cricket-focused social networking app.
 - Implemented video upload/editing, user timeline, article feeds, and social engagement features (follow, share).
 - <https://www.pitchvision.com/app-1704>
 - **Eyvee**: Designed and developed an e-commerce platform for renting designer clothing:
 - Focused on clean UI/UX, product listings, and secure checkout.
 - **Casino Gaming Apps**: Contributed to multiple casino-style multiplayer games with global reach:
 - Developed game logic, improved UI responsiveness
 - Baccarat: <https://apps.apple.com/us/app/baccarat-multiplayer/id915676153>
 - Blackjack: <https://apps.apple.com/in/app/blackjack-multiplayer/id585162977>
 - Roulette: <https://apps.apple.com/in/app/roulette-multiplayer/id501937883>
 - **Instabooth**: Built a photo-editing extension for seamless integration with the iOS Photos app, enabling quick edits and filters directly from the camera roll.
-

RNF Technologies

Software Development Engineer

📅 Aug 2013 - Jun 2014

📍 Noida, India

- **Advanced Scientific Calculator**
 - Designed and developed a feature-rich scientific calculator app.
 - Implemented core mathematical modules including graph plotting (using Core Plot), matrix operations, equation solvers, differentiation/integration, and unit conversion.
 - Focused on algorithmic accuracy and performance optimization for mobile devices.
 - <https://apkfab.com/scientific-calculator/com.phonato.scientificcalculator.activities>
- **True Alarm Clock**
 - Built a highly interactive and gamified alarm application to enhance wake-up reliability
 - Integrated cognitive challenges such as solving math problems, image recognition (CAPTCHA), scrambled image puzzles, and memory-based card selection as alarm dismissal mechanisms.
 - <https://www.pgyer.com/ipa/ipa/com.phonato.alarm>

Freelance Projects

- **Turfmates**
 - *Real Estate Application for US market*
 - Contributed as a freelance iOS developer to a next-generation real estate platform for the US market; the application was later sold to a US-based entrepreneur (product was sunset in 2019 due to strategic business reasons).
 - Implemented features including real-time chat and immersive 3D home tours to improve user engagement and decision-making.
 - <https://www.crunchbase.com/organization/turfmates>
- **Oye Captain**
 - *Cricket Fantasy Platform*
 - Developed a fantasy sports platform focused on cricket, tailored for the Indian market, which was sold to Mirch Entertainment Pvt. Ltd.
 - Built core gameplay features that include league creation, real-time scoring, and wallet-based transactions.
 - Supported free and paid leagues with automated prize distribution, enhancing platform retention.
 - <https://www.prnewswire.com/in/news-releases/mirch-entertainment-set-to-launch-oye-captain>

Awards and Recognitions

- **Gold Medalist – B.Tech in Computer Science:** Awarded the [university gold medal](#) for ranking **1st across all engineering streams**, presented by the [Vice President of India](#), Dr. Hamid Ansari in recognition of [academic excellence](#).
- **Tech Impact Award – Uber:** Recognized for enabling global payment integrations across Uber Rides and Eats, driving \$1 billion+ in incremental revenue.
- **Ramanujan Award – Meta:** Awarded for significantly improving audio and video call quality and enhancing real-time communication experiences at scale.
- **Citrix Innovation Award – Citrix:** Awarded the [Citrix Innovation Award](#) for impactful enhancements to Citrix enterprise applications such as Podio and Secure Mail, significantly improving performance and user experience.

Expert Talks

- **Meta GenAI Summit:** Presented a technical session on Virtual Backgrounds using Generative AI in the Meta applications, demonstrating real-time background synthesis and its integration into video calling experiences.
- **Swift Summit – Hyderabad, India:** Invited expert speaker on 'Animations in Swift', attended by 250+ engineers from leading mobile development teams. <https://x.com/swiftindiagroup/status/1219259054918422529>
- **Tech Talks – Meta:** Presented technical sessions on the WhatsApp Augmented Reality (AR) pipeline, covering engineering architecture and deployment strategies for AR effects.
